MICRO FIBER

Expanded Offering!

Ultimate Performance Cloth!

- Traps dirt, debris and liquid like a magnet
- Wash 100's of times

Micro fiber is a single fiber with a thickness less than a human hair split 16 times and woven into various products. This splitting increases the surface area over 15 times the usual, creating millions of V-shaped gullets with edges that trap and collect particles rather than pushing them away like conventional cotton.

Wet Cleaning Cloth (Blue)

Used for general wet or dry applications. Works best when sprayed with a light water mist to deep clean.

Dry Tack Cloth (Red)

The woven terry cloth has a low profile to resist snagging and help pick up embedded debris. This cloth is used in a dry dusting application.

Polishing Cloth (Yellow)

Streak free cleaning of mirrors, optical lens and high polishing items.

Dusting Mitt (White)

Double sided dusting mitt can be used for wet or dry applications. For best results lightly dampen the mitt for heavy cleaning.

Micro Fiber Mop

The most efficient way to clean floors, wet or dry. Dry mopping laminate, hardwood or tile picks up loose dirt and particles. Use the cleaner for quick clean up of spills and ground in dirt to rejuvenate shine without residue buildup. The telescopic handle adjusts for all user heights and the swivel head makes easy maneuvering on the floor, wall or ceiling.

NOTE: Blue Magnet Mop Kit contains swivel/threaded telescopic steel pole, mop head, micro fiber pad and floor cleaner.

Floor Cleaner

- Ready-to-use, one step application for all finished hardwood and laminate floors.
- Unique formula dries fast with no residue.
- Rejuvenates shine on older finishes.
- Protects floor from dulling in high traffic areas.
