

Cloth Application

For general purpose sanding where flexibility and tear-resistance are most important. Cloth backing provides increased strength and durability.

- hand strapping
- light deburring
- blending machine tool marks
- cleaning pipe & tubing

Screen Application

For sanding where life and load resistance are most important. Coated on both sides with silicon carbide abrasive, the open mesh design also allows you to rinse and reuse.

- sanding plastic pipe prior to gluing
- preparing copper pipe and fittings prior to soldering
- sanding softer materials where loading is a major problem such as plaster, wood, drywall, brass, etc.

Paper Application

For fast, easy sanding when long life and consistent finish are most important. High strength latex backing offers superior strength and reduced edge wear. PSA backing for easy on/off.

- preparing primed and painted surfaces
- bare wood sanding
