

## Application

Flexible, non-woven pads are ideal replacements for steel wool for heavy duty cleaning and stripping through finishing to light duty polishing:

- won't rust, shred or splinter
- washable and reusable
- can be cut or folded
- use with/without chemicals

Heavy duty cleaning of grills, metal outdoor furniture, etc.	Use with chemical strippers for heavy duty stripping and scrubbing of surfaces to remove paint, varnish and other coatings.

## Applications

Micro-fiber is a single fiber with a thickness less than a human hair that has been split 16 times and woven into various products. The surface area of the micro-fiber product is increased over 15 times, creating millions of spaces between the fibers which trap dirt, grime or liquids, making this product one of the most absorbent materials.

These “V” shape splits, while less than a micron in size, have edges that collect debris as opposed to pushing debris away. The particles are trapped in between the fibers and can be rinsed or machine washed to release heavily embedded particles. Micro-fiber products can be washed up to 300+ times without losing cleaning and trapping abilities. Micro-fiber products save you labor time and additional costs of multiple cleaning products and chemicals.

Use the micro-fiber products dry for general cleaning.

To remove spills, stains or grime, lightly dampen the product for best results. All micro-fiber products can be used with or without chemicals.

### Micro-Fiber Cleaning Cloth (Blue)

Used for general wet or dry applications. Works best when sprayed with a light water mist to deep clean.

### Micro-Fiber Dry Tack Cloth (Red)

The woven terry cloth has a low profile to resist snagging and help pick up embedded debris. This cloth is used in dry tack applications.

### Micro-Fiber Polishing Cloth (Yellow)

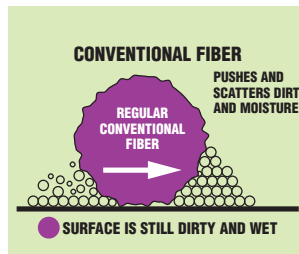

Streak free cleaning of mirrors, optical lens and high polished items.

### Micro-Fiber Cleaning Mitt (White)

Double sided dusting mitt can be used for wet or dry applications. Hand fits inside. Great for corners. For best results lightly dampen the mitt for heavy cleaning.

### Tack Cloth (Non-Microfiber)

Special “tacky” coating picks up sanding residue and loose dust to ensure a quality, smooth, final finish. Disposable.

SURFACE PREP / CLEANING

**tip**

Micro-fiber is virtually scratch resistant but may pick up debris that can scratch. Clean micro-fiber products often for best results.

## Applications

Using the micro-fiber mop and floor cleaner as a cleaning system after floor installations provides the best, most cost-effective way to remove grease, oil and dirt to leave wood floors with a glistening shine. Makes conventional mops outdated

### Floor Cleaner

- Ready-to-use, one step for all finished hardwood and laminate floors.
- Unique formula dries fast with no residue.
- Rejuvenates shine on older finishes.
- Protects floor from dulling in high traffic areas.

### Micro-Fiber

- Attracts dirt and debris like a magnet within the V-shaped splits of the fibers rather than just pushing it around like cotton mops.
- Pad can be washed and reused hundreds of times.
- Hook and loop fastening strips for easy on and off.
- Swivel head makes maneuvering around furniture easy.
- Telescoping handle adjusts for user height and reaches walls and moldings.

## SPONGE PADS

### Commercial Cellulose Sponges

Cellulose sponges are made of durable, high quality cellulose. These sponges will hold many times their own weight in liquids, which gives you maximum absorbency for spills or carrying your cleaning solutions. Sponges are available in three convenient sizes for any application.

### 2-in-1 Erasing/Cleaning Pad

One side white melamine foam to clean virtually any surface of marks or scuffs without chemicals or sprays - ink, crayon, soap scum, etc. One side blue polyester foam to wipe away residue. Toss when melamine is degraded.

### Clean 'N Sponge Light Duty

Cellulose sponge carries water or cleaning solution to the job and later wipes up residue. Excellent for cleaning vitreous china sinks, tubs, toilets, ceramic, plastic and rubber, tile countertops, desks, screens, etc. Non-woven material has gentle cleaning action.

### Scour 'N Sponge General Purpose

Cellulose sponge carries water or detergent to the job surface. Extra strong non-woven material scours, scrubs and cleans the area. Sponge carries residue away. Excellent for cleaning stoves, counters, cooking utensils, ceilings and walls.
